Agency Strategic Objective(s):

005SO18012: Enhance conservation planning with science-based tools and information.

005SO18013: Promote productive working lands.

Agency Priority Goal(s):

- Briefly describe the investment's return on investment, including benefits internal and external to the government and outcomes achieved or planned.**

This investment provides geospatial products and services to enterprise-wide users and supports sharing of Common Land Unit (CLU) data with FSA and USDA. Thru dissemination of CLU via farmers.gov, it supports the USDA mission, making available geospatial data and applications to support Conservation, Farm Records, MIDAS and Farm Loan programs. The imagery archive is considered historical and unique in nature and dates to 1955, providing at least 10 years of images of every county within the contiguous U.S. Additional products include coverage of Puerto Rico and the US Virgin Islands. By having this consolidated geospatial investment, the enterprise eliminates duplication of effort, facilitates centralized management, reduces cost for like services, and enhances data protection. Qualitative return on investment (ROI) is found in a single source for these geospatial assets, reducing the costs of storage and ensuring an

authentic dataset that has been acquired and inspected. This establishes a centralized location of historical land data available for agricultural science and research purposes, as well as supporting disaster response. While there are numerous commercial services with similar data stores, there are no other resources available to USDA and cost share partners that support this comprehensive, centralized archive of geospatial products and historical data. Quantitative ROI includes progress towards measurable results in improved year-over-year performance in areas such as clarity in planned and obligated cost details within the investment.
