This is required for Agency IT Portfolio Summary Part 1 and Part 2 Investments, not for Part 3 Investments.**

Agency Strategic Objective(s):

005SO18006: Increase agricultural opportunities and support economic growth by creating new markets and supporting a competitive agricultural system.

Agency Priority Goal(s):

- Briefly describe the investment's return on investment, including benefits internal and external to the government and outcomes achieved or planned.**  
Current production levels are at all-time highs qualitatively. Normal crop insurance cycle demands, as well as FCIC Board approved changes, have led to 1 to 2 deployments monthly with high quality results and performance in production. This quality development and support to emergency and out of cycle requirements has been instrumental in crop insurance program delivery. This investment has helped RMA improve its business and increase crop insurance products available to producers and ranchers. Between 2011 – 2019, the program has grown from 72,000 country crop program offerings to 127,000. Without IT, we would not have been able to expand and offer the crop insurance program to farmers. Qualitative benefits have included measurable product owner / business user requirement development and realization of business outcomes throughout projects and enhancements. Through access to critical databases and crop insurance data, our joint business / IT teams have been able to

quickly respond to legislative initiatives such as the 2019 disaster bill and make necessary application changes to ultimately provide relief to our nations producers.
